CLASSIFICATION	OTHER SIMILAR CLASSIFICATIONS
<b>TPB 8</b>	ISMWSF (Old Class) Class 2,3,4,5 & 6 CP-ISRA Class 3, Class 4 ISOD LA 2, LA 3, Hip Disarticulation, A1, A2, A3 & A4, (A9)
<b>WHEELCHAIR BOUND BOWLERS</b>	

## Unable to bowl from a standing position

### Functional (ISMWSF Class 2, 3, 4, 5 & 6):

1. Wheelchair-bound with normal function in throwing arm and poor, moderate or good sitting balance.
2. Have normal or nearly normal upper limb function.
3. Have active or no active trunk movements.

### Minimal Disability:

At least a decrease in muscle strength of 10 points to include both lower limbs when testing the 0 – 5 scale grade system (Not counting grade 1 and 2). A normal person obtain 40 points in each lower limb (Total 80 points on both lower limb).

### CP-ISRA Class 3 – Quadriplegic (Tetraplegic)

Severe Hemiplegic Moderate (asymmetric or symmetric) quadriplegic or severe hemiplegics in a wheelchair with almost full functional strength in dominant upper extremity. It is rare for an athlete with athetosis to be included within this class unless he/she presents with a predominantly hemiplegics or triplegics profile with almost full function in dominant upper limb. Can propel a wheelchair independently.

**Lower Extremities** – Spasticity Grade 4 to 3 – Some demonstrable function can be observed during transfer. May be able to ambulate with assistance or assistive devices but only for short distances.

**Trunk Control** – Fair trunk control is shown when pushing chair, but forward trunk movement is often limited by extensor tone during forceful pushing. Some trunk movement can be noted also in throwing for postural correction, but throwing motions are mostly from the arm. This is a major factor in non-ambulatory capability. Rotation is limited. Spasticity Grade 2+.

**Upper Extremities** – Moderate limitation Spasticity Grade 2+ in dominant arm shown as limitation in extension and follow through.

**Hand Function** – Dominant hand may demonstrate cylindrical and spherical grasp, with poor finger dexterity demonstrable in release of bowl.

### CP-ISRA Class 4 – Diaplegic

Moderate to severe involvement. Good functional strength with minimal limitation or control problems noted in upper limbs and trunk.

 Tel: 603-74923226 Fax : 603-74923227 Email : administrator@mtbc.org.my

**Lower Extremities** – Moderate to severe involvement in both legs Spasticity Grade 4 to 3 usually rendering them non-functional for ambulation over long distances without the use of assistive devices. A wheelchair is usually the choice for sport.

**Trunk Control** – Spasticity Grade 2 – 1, minimal limitation of trunk movements Spasticity Grade 2 to 1 when wheeling and throwing. In some athletes, fatigue can increase spasticity which can be overcome with proper positioning. When standing, poor balance is obvious even using assistive devices.

**Upper Extremities** – The upper limbs often show normal functional strength. Minimal limitation of range of movement may be present but a close to normal follow through and propulsion is observed when throwing or wheeling.

**Hand Function** – Normal cylindrical/spherical opposition and prehensive grasp is seen in all sports. Limitation if any is usually apparent only during rapid motor tasks. It should be remembered that diplegia implies that there is more spasticity in the lower than the upper extremities. Some involvement spasticity Grade 2+ to 1 can be seen particularly in functional movements of the hands, arms and trunk.

**LA 2** – Wheelchair bound bowlers with normal function in throwing arm and poor to moderate sitting balance; reduced function in throwing, but good sitting balance.

**LA 3** – Wheelchair bound bowlers with normal arm function and good sitting balance.

**Amputees;**

- A1 – Double AK (above or through knee joint)
- A2 – Single AK (above or through knee joint)
- A3 – Double BK (below knee, but through or above talo-crural joint)
- A4 – Single BK (below knee, but through or above talo-crural joint)
- A9 – Combined lower plus upper limb amputations.

CLASSIFICATION	OTHER SIMILAR CLASSIFICATIONS
<b>TPB 9</b>	ISOD LA 5
<b>STANDING BOWLERS WITH LOWER LIMB DISABILITY</b>	

**1. A motor paresis of the lower extremity**

At least a decrease in muscle strength of 10 points to include both lower limbs when testing the 0 – 5 scale grade system (not counting grade 1 and 2). A normal person obtain 40 points in each lower limb (Total 80 points on both lower limbs).

**LA 5**

Ambulant with normal function in throwing arm. Reduced function in lower limbs or balance problems.

- A3 – Double BK (below knee, but through or above talo-crural joint)

<b>STANDING BOWLERS WITH UPPER LIMB DISABILITY</b>	

### 1. A motor paresis of the upper extremity
